

Spelling Weeks 26 and 27
Test will be _____

Using the information from the flipchart, write the meaning of each term or rule.

A suffix is:

Adding a suffix sometimes changes the spelling of the base word. There are three common ways we can change the spelling:

1. **Consonant doubling (runner, running)- Double the last _____ when adding a _____ suffix to words ending in a _____ followed by one _____.**
2. **Changing y to "i" (flies, happiest):** The letter y at the beginning of a word acts as a consonant and makes the /y/ sound as in _____. However, the "y" at the end of a word either stands for a vowel (fly) or is part of a vowel digraph (play). The change from _____ when the words end in consonant y means the vowel sound is maintained. We do not change the y to an "i" if there is a _____ before the y.
3. **Delete the silent "e" (making):** When a word ends in a silent _____, the letter "e" is usually removed before adding a _____. (except _____). This is because most suffixes begin with vowels and a double vowel would create great confusion!!!

Focus for the week: Rule:

Single vowel _____ changes to _____ when adding any ending. _____ **the ending begins with "i."**

Example: cry _____ (add er)

Cry _____ (add ing)

Worry _____ (add some)

Worry _____ (add ing)

Circle the 8 misspelled words below. Write them correctly on the lines.

I thought about starting a business. I would enjoy employeing people and paying them salaryes. I know this is a fanciful idea at my age, but I have heard of other young entrepreneurs. I should clarify; I don't want to start something that is babbyish. The business would deal with myserious aplyances that have somehow stopped working! I would use posters and advertisements for convaying my messages about my buisienss. This extra income would bring my family great happyness.
